To Whom It May Concern,

Subject: Endorsement of University Research on the Processing of Nigerian Lithium Ore for Lithium-Iron Phosphate (LFP) Battery Production

We, **SIKTEC Integrated Services Limited**, a company engaged in solar energy solutions and inverter manufacturing in Nigeria, are pleased to endorse the research initiative undertaken by the ATBU Research Team on the *Processing of Nigerian Lithium Ore for the Production of Lithium-Iron Phosphate (LFP) Batteries*.

This research is both timely and impactful, considering Nigeria's abundant lithium resources and the urgent global need for sustainable energy storage solutions. We believe the outcomes of this project will:

1. Advance local expertise in lithium beneficiation and battery materials.
2. Support Nigeria's energy independence by reducing dependence on imported batteries.
3. Create industrial growth opportunities and foster job creation in the renewable energy sector.
4. Contribute to climate change mitigation by promoting clean energy adoption.

SIKTEC Integrated Services Limited is confident in the competence of the Research Team and we are committed to supporting this research through industry collaboration where needed. We fully endorse this project and encourage all stakeholders and donor agencies to provide the necessary support for its success

Sincerely,

Engr. Sikiru Ibrahim
Managing Director / CEO
Siktec Integrated Services. Ltd.
