### To:

Principal Investigator / Research Lead  
Abubakar Tafawa Balewa University  
Bauchi.

Dear Sir,

### INTENT TO PURCHASE PROCESSED LITHIUM PRODUCTS

Our company, Siktec Integrated Services Limited is a renewable energy solutions provider. We specialize in the manufacturing of inverters, solar panels and energy storage systems. We are based in Bauchi state. We are pleased to express our intent to collaborate with your team on the commercialization of locally processed lithium products derived from Nigerian pegmatite ores.

Subject to the successful completion of your ongoing research on beneficiation, roasting, leaching, and lithium recovery, and the achievement of battery-grade lithium Phosphate or lithium-ion specifications, we hereby indicate our preliminary interest in entering into an **off-take agreement** for the purchase of 50 tons per year of processed lithium products.

Our intention includes:

- **Technical Collaboration:** Participation in technical review meetings to ensure product quality aligns with our  $\text{LiFePO}_4$  cathode manufacturing requirements.
- **Purchase Negotiation:** Initiating commercial negotiations for an off-take agreement covering price, delivery schedules, and quality assurance once pilot production data is available.
- **Support for Pilot Scale-Up:** Exploring opportunities to co-fund or provide technical input for the scale-up of your laboratory findings to pilot-plant level.

This Letter of Intent is non-binding and is subject to the execution of definitive agreements, mutual acceptance of product quality standards, and successful demonstration of technical and economic feasibility.

We commend your efforts in advancing Nigeria's participation in the global lithium value chain and look forward to potential collaboration.

Sincerely,

Engr. Sikiru Ibrahim  
Managing Director / CEO
