National Agency for Science and Engineering Infrastructure,
Abuja.
Dear Sir,

**ENDORSEMENT LETTER IN RESPECT OF DR SANI GARBA DURUMIN IYA FOR
RESEARCH COMMERCIALISATION PROPOSAL APPLICATION.**

I have known this applicant for over fifteen years now as my former undergraduate Physics student. He showed a lot of enthusiasm and devotion of a scholar in his studies culminating in a very successful first degree programme. He graduated with a B. Sc (Honours) degree in Physics of Kano University of Science and Technology, Wudil, in the year 2009. He completed a very high quality final year undergraduate project in renewable energy under my supervision. He has since completed his M Sc Degree programme from University Sultan Zainal, Abidin in 2015 and the P hD degree in Physics of Universiti Hussein, Johor, Malaysia in the area of Materials Science in 2019.

In the course of my interaction with him he proved to be an intelligent, diligent, capable and a reliable scholar. His ability for original and creative thinking is very good. He is of good character, physically, mentally and emotionally very stable and gets on well with people.

While here at Kano University of Science and technology he distinguished himself for hard work, deep commitment to assigned responsibilities and high integrity.

He has always distinguished himself for hard work, deep commitment to assigned responsibilities and high integrity. Dr. Sani G. Durumin Iya has always been a devoted lecturer, well-liked by his students and very capable of communicating advanced scientific ideas to the comprehension level of his students. He is all along always ready to shoulder extra Departmental responsibilities by serving as Level Coordinator of many levels and currently the HOD of Department of Physics, Faculty of Science at the Sule Lamido University, Kafin Hausa, Jigawa State.

Please accept the assurances of my best regards.

Yours faithfully,

Professor A. O. Musa.
(Materials and Energy Research Group Leader)
