19th September 2025

The Chief Executive Officer (CEO),
National Agency for Science and Engineering Infrastructure
(NASENI), Abuja.

Dear Sir,

Endorsement Letter for NASENI Research Commercialization Grants

Program (NRCGP) 2025.

I am writing on behalf of The Federal Polytechnic, Ilaro, to formally endorse the research on Prompt Inferno Reporting System for the NASENI Research Commercialization Grant Program (NRCGP), 2025, led by The Innovation Centre of The Federal Polytechnic, Ilaro. This endorsement is based on the security of lives and property that the system renders as demonstrated within the southwest region of Nigeria.

The Federal Polytechnic, Ilaro understands the importance of this research that reporting the occurrence of inferno to fire fighting agency will make for a good response of the agency to the inferno, thus putting out the inferno promptly, hence, ensuring the safety of lives and property. The objectives of the system is to design a wireless fire reporting system that will supply the following information to the firefighting centre; address of venue of incidence, time of the inferno occurrence and the distance of firefighting office to the vicinity of the inferno. These information will be helpful to the fire fighting personnel in arriving promptly. Furthermore, the system also furnishes the occupants of the building that are away with the information on the inferno.

The system aligns with the Renewed Hope Agenda of the current administration of President Bola Ahmed Tinubu towards providing safe and secured environment for all sundry, where fire hazards is brought to its bearest minimum.

Our institution have observed the contribution of NASENI in the provision of grants towards infrastructural development that are targeted at improving local development of infrastructures that has the potentials to increase the nation's GDP. We are confident that the development of Prompt Inferno reporting System will:

1. Reduce the destruction of lives and property in the event of inferno
2. Provide necessary information to firefighting personnel to enhance better response to inferno
3. Reduce the losses associated with inferno

In the light of these benefits, I wholeheartedly endorse this grant application and state our support for this worthwhile cause by NASENI.

For further discussion on this endorsement, kindly reach out to the undersigned through the address stated on this letterhead.

Sincerely,

Dr. S. A. Odunlami
