Budget (N47, 792, 303. 09).

Budget Categories				
	Items	Cost (N)	Justification	Total (N)
1.0. Perso nnel cost	1.1. Principal Researcher	1,937,644.34	The enormous task before us	
mici cost	1.2. Team members (8)	4,290,498.17	demands we should not hit	
	1.3. Technical support (3)	484,411.085	the ceiling of 20% for	
	1.4. Others (Research Assistants) (2)	207, 604.751	personnel cost. Our personnel cost is rather at 19.35 % of the budget. It was a mutual agreement of team members to follow our University Post graduate supervision emolument. The PI will receive 28% of total allocation, technical support will receive 7% and research assistants 3%. The cost will be paid quarterly after each	
			report/quarterly meetings hence regularity of quarterly	
			meetings will be ensured.	
Subtotal				6, 920, 158.35

2.0	Equipment (List & Specify)			
	Flour Mixer (GGHMJ200) Gelgoog	500,000	Essential for mixing flour and water; ensures uniform dough consistency	
	Dough Sheeter (GGMT9-80) Gelgoog	600,000	Rolls the dough into sheets; critical for achieving the desired noodle thickness	
	Noodle Cutting Machine (GGQF120) Gelgoog	300,000	Cuts the rolled dough into noodle strands; necessary for shaping the final product.	
	Steaming Machine (GGCZM63)	600,000	Cooks the noodles by steaming; vital for developing texture and flavor	
	Extruder (AHE78H)	800,000	Shapes and forms the noodles under pressure; a key component in noodle production.	
	Frying Machine (GGYZ100)	700,000	Deep fries the noodles to achieve a crispy texture; essential for instant noodles	
	Drying Machine (GGYZ200)	700,000	Removes moisture from	

		fried noodles; important for shelf stability and texture.
Seasoning Mixing Machine (Local fabrication)	400,000	Ensures uniform mixing of seasonings; crucial for consistent flavor in the final product.
Quality Control Scanner (Local fabrication)	200,000	Inspects product quality and consistency; important for maintaining standards and customer trust
Conveyor Belts GGSS120	400,000	Facilitates smooth movement of products between stages; enhances workflow efficiency
Locally fabricated Stainless Pasteurization drum) (1)	950,000	For steam sterilization of saw dust to be used for mushroom production
Locally fabricated Gas cooker (1)	150,000	Heating of the Pasteurizing drum
Locally fabricated heavy duty tripod	56,000	Stand for the stainless drum
Gas Cylinder (12,5kg) Jumia, Nigeria	53,700	For steam sterilization of saw dust

	10kg Solar dryer CT-CGQXW (1) Generator Thermocool 7.5 KVA Optima 9200RS Remote	320, 000	Drying of mushroom and African Palm Weevil For powering of noodle	
	(1)	520, 000	production machines	
	Grinding/milling machine (Petrol engine) Gx200 (1)	225,000	Grinding of dried African Palm Weevil and Mushroom	
	Laptop (Hp Notebook 348G5 Intel Core 15-16GB RAM/ 1TB SSD/ Backlit Keybord- Windows 11 Prp + Bag) Jumia	560,000	Data storage and data analysis	
	Construction of thatched Incubation Mud house or cost Air Conditioner in existing room	N450,000	Needed as alternative to the use of airconditioned room which is usually affected by power outage	
	Automatic Mushroom bagging and capping machine	4,504, 216.41	Bagging large quantities of substrates in a short time	4,504, 216.41
	Lyophilizing machine	7, 050, 000	Freeze drying of mushroom to retain nutrients	7, 050, 000
Subtotal			Equipment total is at 24.84% ans so did not exceed 25% allotted, this because a lot of chemical analytical tool required will be provided at	20,438, 916.41

Consumables	for Mushroom		
	500 bags Sawdust (100kg) @N500/bag	N250, 000	Target is to produce one ton of mushroom
	300 bags of Wheat bran (50kg) @ N2000	N600,000	ι.
	20 kilos Chalk powder @ N3000	N60,000	ι.
	10,000 Nylon (17x 4.5cm) @ N100 each	100,000	66
	1000 bottles of Mushroon Spawn @ N1500/bottle	1,500,000	· · ·
	20 bottles of Ethanol (98%) @N17,780.40/bottle	355,608	· · ·
	20 litres of Methanol (99%) @ N7000/bottle	140,000	ι.
	Bamboo and 2 x 4ft wooden plank for setting up platform for stacking of mushroom pods	55,000	The pods must be stacked on platforms where they will be
	Bamboo (50) @ N1,100 each 2 x 4Ft plank (20) @ N1,500	N30,000	sprinkled with water every other day for fruiting to commence
	100 packets of Rubber band @ N200/packet	200,000	For tying the open end of each one kilogram bag of sawdust before sterilization

20 12Ft one inch PVC @ 2	N3000 60,000	For making	
each		rings used in making the bottle like so the open end will be covered with cotton wool to prevent contamination during incubation	
Jute bag (10) N500 each	5,000	For lining the stainless drum so the mushroom pods in polythene bags does not touch the hot drum during steam sterilization	
10kg Cotton wool@N800/	100g 80000	For stuffing the open end of the polythene bagged mushroom pod.	
10 Plastic sprinkler @ N2,	24,000	Sprinkling water on the pods during fruiting	
Bush lamp (3) @ N500/eac	ch 1,500	For sterilizing the metal spindle used in transferring the mushroom spawn to the sterilized saw dust	
Shovels (10) @ N10,000 ea	ach 100,000	Turning the saw dust, wheat bran and Calcium	

				carbonate
	Wheel barrow (2) @ N50, 000 each	100,000		For carrying sawdust to the mixing or bagging room
	120 litres Waste bin	27,000		For packing all waste materials
Consumables	for African Palm weevil			
	160 pairs of African Palm Weevil adults @ N150	N24,000	furth	be used as dation stock for er iplication
	100 pieces of 3-in -one set of transparent plastic containers @ N15,578.37	N519,279	Will rearin Afric weev	
	Bamboo and 2 x 4ft wooden plank for setting up platform for stacking of mushroom pods Bamboo (50) @ N1,100 each 2 x 4Ft plank (20) @ N1,500	55,000 30,000		provide form/ stand for ng the rearing s
	1 Roll of Chiffon material	15,970	plast	ng the lid of the ic boxes to ent entrance of e flies
	Feed for the larvae Soya bean (5) 100kg@ 180,000 Maize (5) 100kg@ N120,000 Molasses (4) 13 litres @ N17500	900,000		enhance the of the larvae

		N70,000		
Sub total		12, 482, 357	Consumables is at 34.9% of the entire budget, this is to allow enough money for our Monitoring and Evaluation	12 482, 357
Travels				
	African Association of Insect Scientists Biennial Conference, Abuja, 2025 (2 participants)	732,000	Conference attendance is important for our findings to be presented, criticized and put in a form acceptable to high impact Journal	
	Nigerian Society of Entomolgy Annual Conference (2 Participant)	756, 000	cc	
	Local transportation	300,000	A lot of local transportation for purchases, survey and baseline studies will be involved in the project	1,788,000
6.0	Dissemination (3%)			
6.1	Workshop/ Seminar	N 300,600	Very important for practical training on mushroom and APW production as a skill for economic empowerment as this will help them to adopt the novel	

			product	
	Radio programme	N 130,000	Advert for the new noodle including jingles	
	Journal publication	N 135,000	Publication charge of two papers from our work	
	Television programme	N 200,400	Advert for the new noodle including jingles	
	Public awareness with posters, pictographic handbills,	N 260,000	Advertisement strategy	
Sub-Total		1, 026, 000	Dissemination is at 2.86%, this will ensure creation of public awareness	1, 026, 000
	Others/Miscellaneous (Specify)			
	Monitoring and Evaluation	1,072, 892.77	The project will involve serious monitoring evaluation and so the cost must be part of the budget	1,072, 892.77
	Chemical Analysis	1, 000, 800	The work will involve of a lot of analysis from the base line to analysis of nutritional composition of product and shelf life	
	Contingency		We 5% contingencies believing the work is under low risk but considering	1,788, 154.61

		fluctuations of prices resulting from Nigerian inflationary situation	
Total Direct Cost			
INDIRECTI COST (5% of NASENI Grant) Component of Direct Cost) to Institution	2,275,823.957	For Polytechnic support	2,275,823.957
Grand Total			N47, 792, 303.09
