The Managing Director,
Shoprite Nigeria,
Sango,
Lagos, Nigeria.

Dear Sir/Madam,

LETTER OF INTENT TO SUPPLY TOMATOES AND VEGETABLES FROM SMART HYDROPOONICS FARMING SYSTEM

The Federal Polytechnic, Ilaro, through the Directorate of Research and Development, hereby expresses its intent to partner with your esteemed organization as an off-taker of tomatoes and vegetables produced under the project titled **“Enhancing Agribusiness with Smart Hydroponics: A Technological Approach to Tomato and Vegetable Farming.”**

This project is designed to deliver high-quality, pesticide-controlled, and consistently available produce using smart hydroponic technology. The proposed partnership aligns with our commitment to advancing sustainable agriculture, promoting food security, and supporting agribusiness value chains through innovative, climate-smart solutions.

We anticipate that this collaboration will ensure a reliable market for fresh produce, reduce post-harvest losses, and foster mutually beneficial agribusiness growth.

We look forward to your positive response and further discussions on the modalities for this partnership.

Yours faithfully,

Dr. S. A. Odunlami
