Date: 27th October, 2025

NASENI R&D Grant Proposal

AN ENDORSEMENT LETTER

It is a great opportunity to write an endorsement letter on a research group, responding to the 2025 NASENI Research and Development Grant Call.

The proposal titled *“Industrial Research, Development, and Commercial Production of Sweet Potato Starch Derivatives, Sweet Syrups, Feed Formulations, and Corrugated Board Adhesives for Consumer and Agro-Allied Markets,”* this is timely and agrees with one of the NASENI's thematic Areas. This research is highly pertinent to the field of Agriculture, Food Manufacturing and Industrial Development.

Base on the applicants' research experience and articulation, with clear evidence of conducting independent research and are both physically and emotionally stable and adequate in both written and oral English. The faculty is willing to accord them all the necessary assistance they may require in conducting the research.

I'm optimistic that the outcomes of this research will have significant implications for the wider community. It will also paved a way of producing variety of products for a neglected farm produce.

Prof. AJ Alhassan (PhD, MSc and BSc in Biochemistry)

DEAN Faculty of Basic Medical Science
