The NASENI Research Grant Funding Committee
National Agency for Science and Engineering Infrastructure (NASENI)
Abuja.

The Committee Members,

Endorsement for Dr. Mohammad Ahmad's Research Grant Application

I'm writing to fervently support Dr. Mohammad Ahmad's application for a NASENI Research Grant. North Western Nigerian Renewable and other agricultural practices are already starting to change as a result of Dr. Ahmad's innovative research in sustainable practices.

His recent ecological research team work titled “*Ecotoxicological Effects of Organophosphate and Pyrethroid Pesticides on Soil Physicochemical Properties and Nutrient Dynamics*” is a prime example of innovation rooted in the local context. He has shown exceptional skill in translating scientific theory into practical solutions that uplift rural communities. His work promotes food security, biodiversity, and economic empowerment—core values aligned with NASENI's mission.

I have full confidence in Dr. Ahmad's ability to deliver high-impact results and steward NASENI's investment with integrity and excellence. I urge the committee to give his application your highest consideration.

Thank you for supporting transformative research that drives national development.

Warm regards.

Yusuf Muhammad Bawa
