

MEMO

20th October, 2025

The Executive Vice Chairman/Chief Executive

National Agency for Science and
Engineering Infrastructure (NASENI)
Idu Industrial Area, Abuja.

Sir,

**Letter of endorsement for: Dr. Sayeed M. Shuaibu – application for NASENI
Research Commercialisation Grant Programme**

I am pleased to provide this formal endorsement for Dr. Sayeed M. Shuaibu, a Chief Engineer in the Technical Services Department of PEEMADI Okene, in support of his application to the NASENI Research Commercialisation Grant Programme.

The proposed project, titled “Thermoelectric Refrigerator Powered by Solar Photovoltaic Module and Incorporating IoT,” presents a timely and innovative solution to a critical challenge faced by primary healthcare facilities, military forward operation base units, disaster relief agencies and humanitarian aid organizations operating in remote or underserved areas where access to reliable grid electricity remains limited or nonexistent.

Dr. Shuaibu’s proposed innovation has the potential to significantly enhance the preservation of temperature-sensitive medical supplies, improve operational efficiency and strengthen resilience in off-grid environments. His proven expertise, technical competence and commitment to excellence make him exceptionally well-qualified to execute this project successfully.

I am confident in Dr. Sayeed M. Shuaibu’s ability to carry out the proposed research with the highest standards of rigor, professionalism and integrity. I wholeheartedly endorse his application and strongly recommend him for consideration under this grant programme.

Sincerely,

Enyi Stephen
