## LETTER OF INTENT (LOI)

19 – 09 - 2025

Ref No: WA/NPI20/LI02

To:

The National Agency for Science and Engineering Infrastructure (NASENI)  
Abuja,  
Nigeria

### **Subject: Letter of Intent to Support Commercialization of Clean Cooking Technologies**

We, WELLCOMART TECH-TRADE AND INDUSTRY operating in Lagos, Nigeria, hereby express our intent to collaborate with the Principal Investigator in the person of Dr. Oluwatoyin Olugbemi in the commercialization and deployment of integrated clean cooking solutions, including **compression of biogas, sustainable briquettes, and compatible stoves**.

Our organization has witnessed and participated in the pilot activities supported by the TechWomen program in 2019 and can confirm the viability and acceptability of the proposed solutions. We recognize the multiple benefits of this innovation, including:

- Affordable and sustainable access to clean cooking energy.
- Reduction in reliance on firewood and charcoal, thereby mitigating deforestation.
- Improved air quality, health outcomes, and livelihoods for our members.
- Additional agricultural benefits through the use of slurry fertilizer.
- Job creation to engage our youths.

Furthermore, we attest to our full support by having our President and Director of R&D, Mrs. Nnabugwu Chinyere Peace serve as a **Supporting Investigator** to the **Principal Investigator**. This strengthens our technical oversight and ensures smooth translation from pilot success to large-scale commercialization.

Accordingly, we are willing to serve as an **off-take partner** for the project upon successful scale-up supported by NASENI.

We look forward to continued collaboration toward achieving Nigeria's **Renewed Hope Agenda** and sustainable development goals.

Sincerely,

Nnabugwu Chinyere Peace  
President

Uzundu Love Chioma  
Secretary
