

# NASENI MEMO

Date: 14th October, 2025

The Executive Vice Chairman/CEO

National Agency for Science and Engineering Infrastructure (NASENI)

Idu Industrial Layout F.C.T, Abuja

## LETTER OF ENDORSEMENT FOR NASENI COMMERCIALIZATION RESEARCH GRANT PROPOSAL

I am pleased to formally endorse the research proposal titled: "Waste to Energy Innovation: Harnessing incinerator heat for renewable power generation in Nigeria by Engr. Dr. Aghadua Segun, Chief Engineer, National Engineering Design Development Institute (NEDDI), Nnewi. The proposed project is innovative and aligns strongly with NASENI's mandate of promoting indigenous technology development, renewable energy utilization, and commercialization of locally engineered solutions for national industrial growth. The research addresses a critical challenge in Nigeria's energy sectors. This project has the potential to enhance power generation in Nigeria,

I therefore strongly recommend this proposal for consideration and support under the NASENI Commercialization Research Grant Programme. I am confident that the successful execution of this project will contribute significantly to national development and local content advancement in renewable energy-driven agro-mechanization.

Please accept the assurances of my highest regards.

Yours faithfully,

Engr. Jacob Koburu

Deputy Director of Research and Development

National Engineering Design Development Institute (NEDDI), Nnewi
