6th October 2025

The Executive Vice Chairman/CEO
National Agency for Science and Engineering Infrastructure (NASENI)
Federal Ministry of Science, Technology and Innovation
Abuja, Nigeria.

Letter of Consent to Supervise the Project – “Development and Commercialization of Herbicides and Pesticides from Pyrolytic Oil”

Dear Sir,

I hereby write to express my consent to serve as Supervisor for the proposed NASENI-sponsored project titled “**Development and Commercialization of Herbicides and Pesticides from Pyrolytic Oil.**”

As a Professor of Chemical Engineering with extensive experience in research, development, and project supervision, I have successfully supervised and co-supervised numerous undergraduate, postgraduate, and applied research projects over the past twenty-five years. My research interests span catalysis, chemical process development, biomass conversion, and environmental engineering. I have participated in and led multiple research and collaboration projects from conception to completion.

I have published extensively in high-impact, peer-reviewed international journals, with several publications arising from funded research and applied innovation projects. Many of these works have contributed to advancements in sustainable chemical technologies and the valorization of pyrolytic products for industrial and agricultural applications.

Given my background and long-standing involvement in engineering research and technology development, I am confident that my supervision will ensure the scientific depth, practical relevance, and successful execution of this project.

Please accept this letter as my formal consent and commitment to supervise the above project.

Yours sincerely,

Prof. Garba Kabir
