Dear Sir

ENDORSEMENT LETTER

I am writing to endorse the application for a grant to commercialize the innovative research outcome on the production of microbe-fortified livestock feeds using herbaceous weeds. The proposed establishment of a production plant at Bayero University Kano has the potential to address pressing socioeconomic and environmental challenges in the surrounding communities.

This project will not only create numerous direct and indirect employment opportunities but also enhance livestock farming productivity in the region. Moreover, it will serve as a sustainable solution for managing herbaceous weeds, mitigating bush burning, and promoting soil and biodiversity conservation.

I strongly believe that this project will have a transformative impact on the local economy and environment. Therefore, I am pleased to support the establishment of a production plant for microbe-fortified livestock feeds using herbaceous weeds at Bayero University Kano. I am confident that this initiative will yield significant benefits for the university, the local community, and the environment.

Thank you

Prof. Aminu Bukar
